About us + Clients.

01

Ever the progressive CGI studio, our experience producing realistic content for the architecture, interior, and product design sectors has built us a select group of clients. Over the years, our close partnerships with prominent designers has led to first-class content creation for furniture, architecture, as well as product and interior styling.

Our work brings the unbuilt visions of these sectors to life with the use of engaging CGI stills,feature 3D animations and interactive virtual reality applications.

Photomontage + AVR.

Take your photomontage a step further with: Verified Views. These planners CGIs are also known as Accurate Visual Representations (AVRs) or Verified View Montages (VVMs). If you need planning permission or an idea of how your project will impact the surrounding area, this is the CGI service for you.

CGI verified views are broken down into four different categories.

AVR Level 0: Massing outline
AVR Level 1: Degree of visibility
AVR Level 2: Chalk rendered model
AVR Level 3: Fully rendered with textures
